CORE SKILLS

Linux Docker Ansible

Python Flask Nutanix

VMware Proxmox Cisco

pfSense Fortinet Stormshield

Nginx Apache Graylog

Grafana PRTG GLPI

phpIPAM Veeam HYCU

Git CI/CD VS Code

Local AI Open WebUI Ollama

ComfyUI LM Studio Vulkan

LANGUAGES

French — Native speaker
English — TOEIC 805 (C1)

INTERESTS

- **Sport shooting** — Since 2012. French speed shooting champion 2017, vice-champion 2023. Multiple national team titles. Active competitor in regional and national competitions.
- **3D printing & CAD** — Design and production of functional plastic and CoCr parts, prototyping, jewelry.
- **Music** — Self-taught bass guitarist for 2 years.

PROFESSIONAL PROFILE

Engineering apprentice at ISEN currently working at Oxeegen France, specialized in **Cloud infrastructure, DevOps, automation and local AI**. I design reliable, secure and maintainable systems with a production-oriented approach: documentation, monitoring, hardening, operations automation and thoughtful integration of AI tools.

My dual background in networks/systems and digital engineering allows me to bridge the gap between traditional infrastructure operations and modern cloud-native practices.

EXPERIENCE

Oxeegen France — Network & Systems Technician (Apprenticeship)

Vitrolles, France · On-site · Sep 2025 → Present

Oxeegen is a French engineering company specializing in industrial fluid systems, energy efficiency, and process optimization for the pharmaceutical, cosmetic, and chemical industries.

- Operational maintenance and monitoring of network & systems infrastructure.
- Automation of operational tasks: scripting in Python & Bash, deployment standardization.
- Active participation in security projects: network segmentation, firewall policy management, access control hardening.
- Implementation of monitoring dashboards and alerting rules (PRTG, Graylog integration).
- Contribution to continuous improvement processes: runbooks, technical documentation, knowledge transfer sessions.

Itinsell Cloud — Network & Systems Apprentice

La Ciotat, France · On-site · Apr 2024 → Sep 2025

Itinsell Cloud is a managed hosting and cloud services provider offering IaaS, private cloud, backup, and IT outsourcing solutions.

- Designed and deployed an internal **web bastion** (Flask, Nginx, OAuth) centralizing infrastructure tools and access management.
- Automated VM provisioning on Nutanix AHV using GLPI, Prism API, and Ansible playbooks.
- Administered network security appliances: pfSense (firewall rules, VPN, NAT) and Fortinet.
- Operated monitoring and asset management tools: Hostbill, PRTG, GLPI, Graylog, phpIPAM.
- Managed Nutanix storage (S3-compatible objects), HYCU and Veeam backup policies.
- Conducted a feasibility study for a compliance-oriented Nextcloud offering (HDS / ISO 27001).

L'HELICOIDAL — Metal Staircase Installer (Fixed-Term Contract)

Septèmes-les-Vallons, France · Remote · Jun 2023 → Jul 2023

- Installation and assembly of custom metal staircases on various construction sites.
- Blueprint reading, precise measurements, on-site coordination with project teams.
- Strict adherence to safety regulations and project deadlines.

Starbucks SSP — Barista (Temporary)

Marseille, France · On-site · Jul 2022 → Mar 2023

- Customer service in a high-volume, fast-paced environment.
- Compliance with strict quality, hygiene, and food safety standards.
- Team collaboration under pressure during peak hours.

Fatec Group — IT Discovery Internship

Marseille, France · Jul 2019

- Refurbishment and reconditioning of the company's IT equipment fleet.
- Installed and configured workstations, performed hardware diagnostics and repairs.

EDUCATION

ISEN — Graduate School of Digital Engineering

Marseille, France · 2025 → 2028

Master-level engineering program. Specialization in Cloud computing, cybersecurity, distributed systems, and software engineering. Project-based learning with emphasis on methodology, quality assurance, and industrialization.

Aix-Marseille University — BUT Networks & Telecommunications

Aix-en-Provence, France · 2022 → 2025

Three-year bachelor-level technical degree. Specialization in cybersecurity track with jury commendations. Covers network architecture, system administration, telecoms, virtualization, and IT service management.

Leadership: Vice-President of the Student Council (2023–2024). Organized student events, represented 300+ students in academic boards.

INSA Lyon — Engineering Foundation Year (FIMI)

Lyon, France · 2021 → 2022

First year of the INSA engineering curriculum. Scientific fundamentals in mathematics, physics, computer science, and engineering design. Collaborative project work and team-based learning.

Lycée St-Louis — Bac STI2D (SIN) — High Honors

Gignac-la-Nerthe, France · 2020 → 2021

Science and Technology of Industry and Sustainable Development — Information Systems & Digital track. Network fundamentals, electronics, embedded systems, and project-based learning.

CERTIFICATIONS

- **Cisco CCNP Core Networking** — Advanced routing & switching (professional level)
- **Cisco CyberOps Associate** — SOC operations, alert analysis, operational security
- **AWS Academy Cloud Foundations** — AWS services, security, architecture best practices
- **Stormshield CSNE** — Firewall expertise: design, security, operations
- **Stormshield CSNA** — Network & security administration (administrator level)
- **PIX** — Digital skills certification
- **SecNum (MOOC) — ANSSI** — French national cybersecurity awareness certification
- **Brevet d'Initiation Aéronautique (BIA)** — Aeronautical culture: technical basics, regulations

KEY PROJECTS

- **Nutanix VM Factory** — Automated virtual machine provisioning platform integrating GLPI (ticketing & inventory), Nutanix Prism API, and Ansible. Includes a Flask web dashboard for request management and status tracking.

- **DevOps Web Bastion** — Internal secure portal built with Flask and Nginx, centralizing access to cloud tools, monitoring dashboards, and infrastructure management consoles. Features OAuth2-based SSO and role-based access control.
- **Local AI Lab** — Self-hosted AI stack running Open WebUI, Ollama, ComfyUI, and LM Studio. Experiments with Vulkan backend on non-CUDA GPUs. Exploration of OpenClaw agentic workflows with strict permission boundaries.
- **Administration Squad** — RCON-based game server administration system with Discord bot integration. Real-time moderation tools, smart logging, and automated incident response.
